- Turkish Military Academy & Gazi University, B.S. Degree in Computer Science, 08/2016
- Experienced software developer with a track record of delivering innovative solutions to complex problems.

EXPERIENCE

SENIOR SOFTWARE DEVELOPER, Nexient   *01/2022–Current*

UPS
- Designed, developed and tested various projects for clients' needs. Used Java, Spring Boot, Oracle DB, IBM MQ, Jenkins, Openshift technologies.

ULINE
- Implementing Java based Spring Boot projects for the client. Built an end-to-end web application from scratch. Purpose of this application is to handle Quality Control Tickets within Uline. We used Java, Spring Boot, Angular, DB2 technologies.

JAVA DEVELOPER, Softworld   *10/2020–01/2022*

- Implementing Java based Spring Boot projects for our client **USAA**.
- Practicing Agile/Scrum methodologies within a knowledgeable team and working on various projects at the banking department.

JAVA DEVELOPER, Infosys   *12/2019–05/2020*

- Designed and implemented microservice architecture on Spring Boot framework with using Java to generate pdf reports via Jasper Reporting Tool for our client **UBS Swiss Bank**.
- Consuming Bank's Soap API to build Web Service with Spring Integration.
- Leverage the benefits of teamwork with a large and versatile project in financial domain knowledge of software.
- Tracking code quality with CI/CD tools like Jenkins and SonarQube.

JAVA DEVELOPER, VBT   *06/2018–02/2019*

- Managed end to end software projects including client meetings, business logic analysis, and architecture design using technologies of Java, Spring Boot, Hibernate, IBM DB2 and Vaadin framework for frontend.
- Converted as-is old technology IBM AS/400 framework to new Java Spring Boot Project.
- Developed ERP web application for our client **OYAK Bank** in finance domain for managing retirement accounts of military personals.

APPLICATION DEVELOPER, Vavien   *08/2016–06/2018*

- Designed and built many mobile applications in various domains and released them on both Google Store and App Store.
- With software engineering skills, built end to end apps for clients and also for in-house usage.
- Worked on projects using following technologies: Java, Kotlin, Swift, Android, IOS, PHP, Laravel, Javascript, Angular TypeScript, Web services, REST API, NoSQL, Google Firebase.

SKILLS

- Java | Kotlin | PHP | Javascript | HTML | CSS
- Spring Boot | Hibernate | Maven | Gradle
- Microservices | Web Services | Rest/Soap API | JSON/XML
- SQL/NoSQL/SQLite | Oracle MySQL | IBM Mainframe DB2 | Firebase
- OOP Design Patterns | MVC/MVP/MVVM | Git/GitLab Pipelines
- Agile/Scrum | Jira | CI/CD | Docker | Jenkins | Sonar | Unit Testing | jUnit | Mockito
- Angular | Native Android | Java Swing | Vaadin | Laravel | CodeIgniter | IBM AS/400
